**OLIVETTI d-COPIA 16W and 20W
B/W DIGITAL COPIERS**

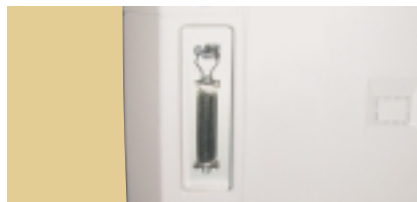

olivetti

HARMONY IN AN OFFICE IS CREATED WHEN STAFF AND THEIR INSTRUMENTS HIT THE RIGHT NOTES SIMULTANEOUSLY. IN THIS CASE THE INSTRUMENTS ARE THE OLIVETTI d-COPIA 16W AND d-COPIA 20W, DESKTOP DIGITAL COPIERS PROVIDING STANDARD PRINTING FOR WINDOWS ENVIRONMENTS AND A WIDE RANGE OF FUNCTIONS INCLUDING AUTOMATIC PAPER FORMAT SELECTION AND FEED CASSETTE AND A SMART SHARING FUNCTION THAT ALLOWS SEVERAL USERS, CONNECTED TO USB AND PARALLEL PORTS, TO SHARE THE MACHINE. THE USER-FRIENDLY, ICON-DRIVEN CONTROL PANEL FACILITATES THE SETTING OF EVEN THE MOST SOPHISTICATED FUNCTIONS AND, WITH THEIR SMALL FOOTPRINT AND EXTREMELY COMPACT DESIGN, THERE IS CERTAINLY ROOM ON ANY DESK FOR THE d-COPIA 16W OR THE d-COPIA 20W.

STRIKING A CHORD

The Olivetti d-Copia 16W and d-Copia 20W digital copiers are designed and engineered to simplify and speed up typical day-to-day tasks of professional workers and small workgroups.

They are also ideal for schools and public authorities that have to keep a tight rein on their initial investment budget, with the further advantage of dividing operating costs between several users. With the Smart Sharing function, it is possible to connect several computers even without network wiring as the copiers are equipped with two connection ports: USB and parallel.

With their compact design and small footprint, the Olivetti d-Copia 16W and d-Copia 20W can be installed anywhere, even on a desktop.

However, an optional, customised table is available if necessary.

ENHANCING HARMONY THROUGH PERFORMANCE

The two models deliver a copying speed of 16 and 20 cpm, respectively: the speed selected depends on users' operating requirements.

The professional level digital technology of these copiers guarantees a print quality of 600 dpi with 256 shades of grey in order to obtain final copies without imperfections.

These models also feature a 25% to

400% zoom with vertical/horizontal orientation function, with the possibility of obtaining copies with white/black inversion.

The copying functions (such as open book, watermark, N-up printing, fit to page and printer status) added to the functions of the standard GDI printer provides sophisticated performance levels usually found only on higher range models.

AS FIT AS A FIDDLE

The Olivetti d-Copia 16W and d-Copia 20W can rely on a paper reserve that is able to cater for daily work loads.

The standard cassette can hold up to 250 sheets and together with the 100-sheet bypass offers a maximum capacity of up to 350 sheets; the d-Copia 20W model offers a capacity of 600 sheets, with the second 250-sheet cassette, which is music to everyone's ears.

The optional SPF feed unit, available on the d-Copia 16W, enables automatic copying of up to 40-sheet original documents. With the Olivetti d-Copia 16W and d-Copia 20W, economy is vital.

The Toner Save mode reduces toner consumption while guaranteeing good quality copying, meanwhile the auto-power-off and Sleep Mode functions enables low power consumption.

up to 40-originals can be placed in the Automatic Feed Unit (option SPF16W-20W)

standard GDI Printer
